

## **Programme Outcome (2022-23)**

### **Master of Arts**

The Master of Arts Programme intends to equip students with knowledge resources and impart specialised skill to enable them find appropriate avenues of higher studies and research as well as placement and employability. The Master's Programme is aimed at competence-building in a holistic, comparative and interdisciplinary perspective. The subject specific programmes try to familiarise students with new areas of research as far as possible, encourage them to read both widely and critically, and seek to equip them with the analytical tools and wherewithal for future research and generation of new knowledge. The teaching in the Master's Programme is oriented towards the goal of catering to societal needs. It therefore aims to make the academic experience of the Post Graduate courses entertaining and instructive for the learners. The syllabi attempt to offer critical yet flexible courses, with special emphasis on skill development and employability, which should prove to be academically viable, socially relevant and economically rewarding.
