### How the teaching and learning process be improved?

#### Summary:

WBSU students highly praise their dedicated, innovative faculty, but emphasize the need for more permanent professors and upgraded digital and laboratory infrastructure. To enhance learning, they recommend highly interactive, practical methodologies like group discussions, student-led seminars, and hands-on projects over rigid lectures. Curricular feedback strongly advocates for a future-ready, job-oriented syllabus aligned with NET/GATE exams, incorporating emerging fields like AI, VR, and specialized research writing. Ultimately, students desire an inclusive, outcome-driven ecosystem that balances conceptual clarity with robust industry collaboration, extended internships, and active placement support to bridge the gap between theory and livelihood opportunities.

Have you ever been appreciated by your teachers or peers while you were a student?
