How the teaching and learning process be improved?

Summary

Students praise their faculty but stress the critical need for full-time professors and upgraded infrastructure, particularly specialized laboratories and computers. Feedback strongly favors shifting from purely theoretical lectures to interactive, practical methodologies—such as case studies, fieldwork, and regular doubt-clearing sessions. To enhance employability, respondents advocate for updating the curriculum to include industry-relevant tools (like Excel, Power BI, and Tableau), structured career counseling, and dedicated research methodology training before dissertations. Finally, transitioning to a modern, continuous assessment model featuring relative grading, course assignments, paper presentations, and mandatory projects is highly recommended to replace traditional exam structures.

Have you made any noteworthy achievement in WBSU or afterwards? Yes* / No
