Canteen,
Career and placement counselling from T & P cell,
Library.

● **Fields that are improving-**

Laboratory and equipment,
Administration,
Seminar,
Classrooms,
Internet and wi-fi.

► In most of the cases, the ex-students have informed that the learning experience they shared is relevant to the real-life application. Also, according

to the feedback, the grievances of the students were taken care of by the departments and the administration very well.

▶ The courses offer well suitability for job requirements but it should be improved more. In the case of independent and critical thinking, students need more support from the teachers as sometimes they lack the parental guidance because of the financial background of their family.

▶ In most of the departments, seminars and special lectures are held adequately. The quality of the guest lecturers in respective departments are also good according to the report.

▶ Any change in the curriculum and syllabi is not suggested. Recruitment of more experienced teachers are rather needed. The students are always appreciated by the teachers and overall ambience of the university campus is very much student-friendly.
