

BOTANY SEMESTER III (2017-2019)
STUDENT FEEDBACK

221 301 Molecular & Cellular Genetics

Specific Comments:

Molecular Genetics and Cell biology taken by Plant Breeding by Dr. Zahed Hossain (Guest Faculty)

- No, but we need permanent faculty or if we can get him as part timer faculty.
- NO

- Need proper practical room and guidance. Need sufficient chemical that require and the faculty for special should be included.

Molecular Genetics and Cell biology taken by Plant Breeding by Dr. Parthadeb Ghosh (Guest Faculty)

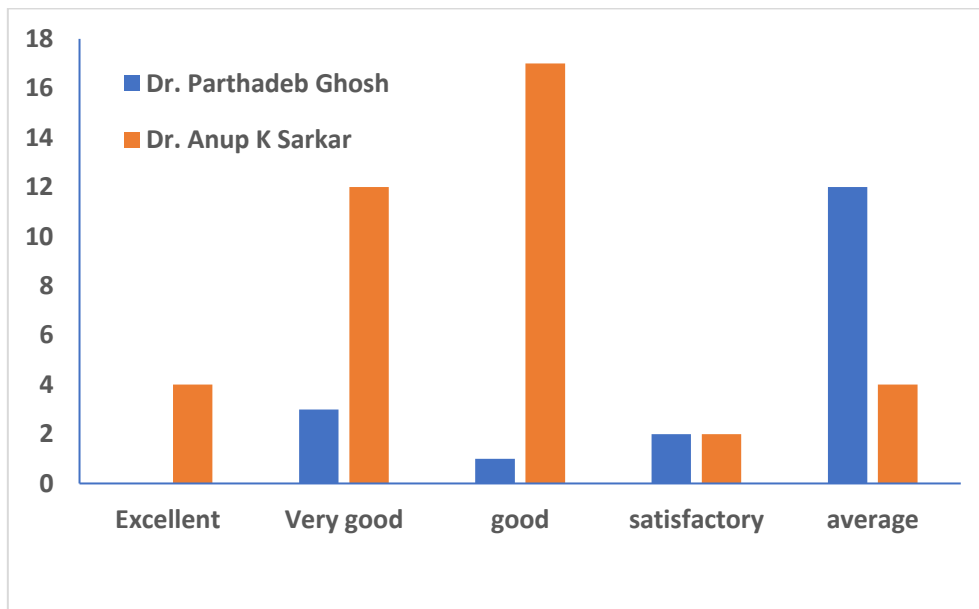

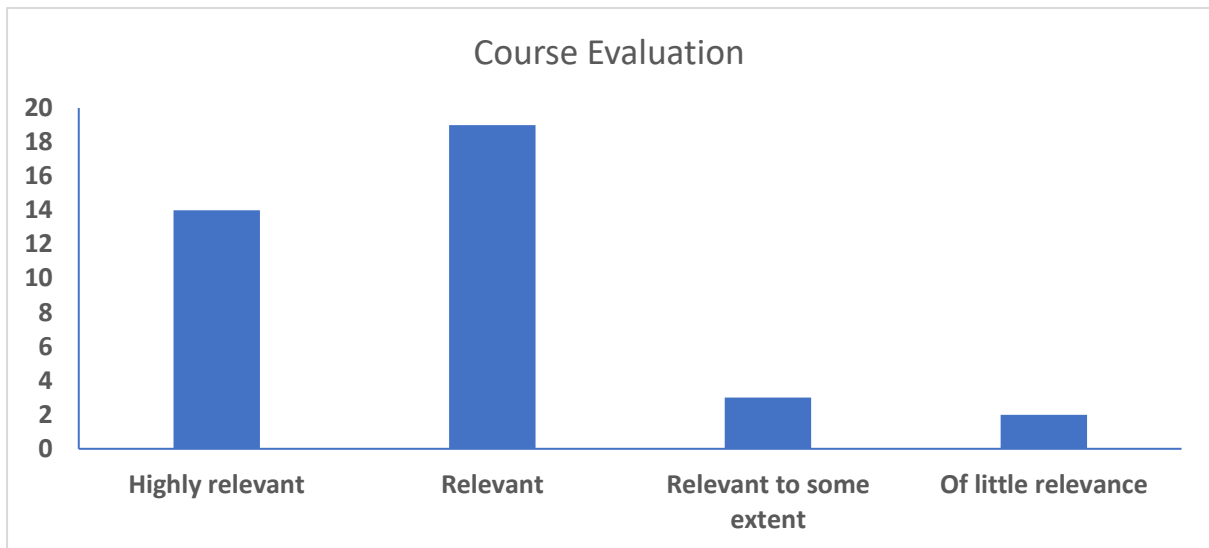

- It is very important subject for a student that's why some upgradation should be required. But there have no any kind of laboratory on genetics paper. So the practical is very poor.
- Laboratory is not available. Microscope is not sufficient and there are very poor and old model. Should be upgrade microscope and lab.
- Yes, I think that the present content of the course need upgradation because the absence of very poor quality of laboratory
- No, I have no any kind of suggestions.
- Needed proper practical Lab
- Yes, Teacher replacement needed due to old fashion teaching technology.
- Genetics laboratory should have to be upgraded
- If the teacher of Genetics be recruited then we will be highly benefitted.
- Teacher replacement needed because the teacher is harmful for some students.
- Permanent faculty is needed and good laboratory needed.
- Laboratory chemical and non-teaching staffs are needed.
- Yes, modern techniques and recent studies may be included in syllabus. I think the syllabus is more traditional.

Molecular Genetics and Cell biology taken by Dr. Anup Kumar Sarkar

- A teacher with good teaching skill is required and a dedicated laboratory is also required. Concept of this subject is not clear due to worse teaching methodology. I personally want replacement of the teacher because genetics is a valuable and highly relevant to our future.
- Genetics is a subject of concept. How can you expect a teacher having conceptual problem can clear doubt of a student? Genetics is pillar to biology. So, my request for a good specialized teacher.

- Genetics permanent faculty is needed and need much more class as well as practical class and good laboratory, Teacher itself need much knowledge. Premature teaching is dangerous for our future.
- We need some practical classes and laboratory and need more teachers.

221 302 Plant Breeding

Specific Comments:

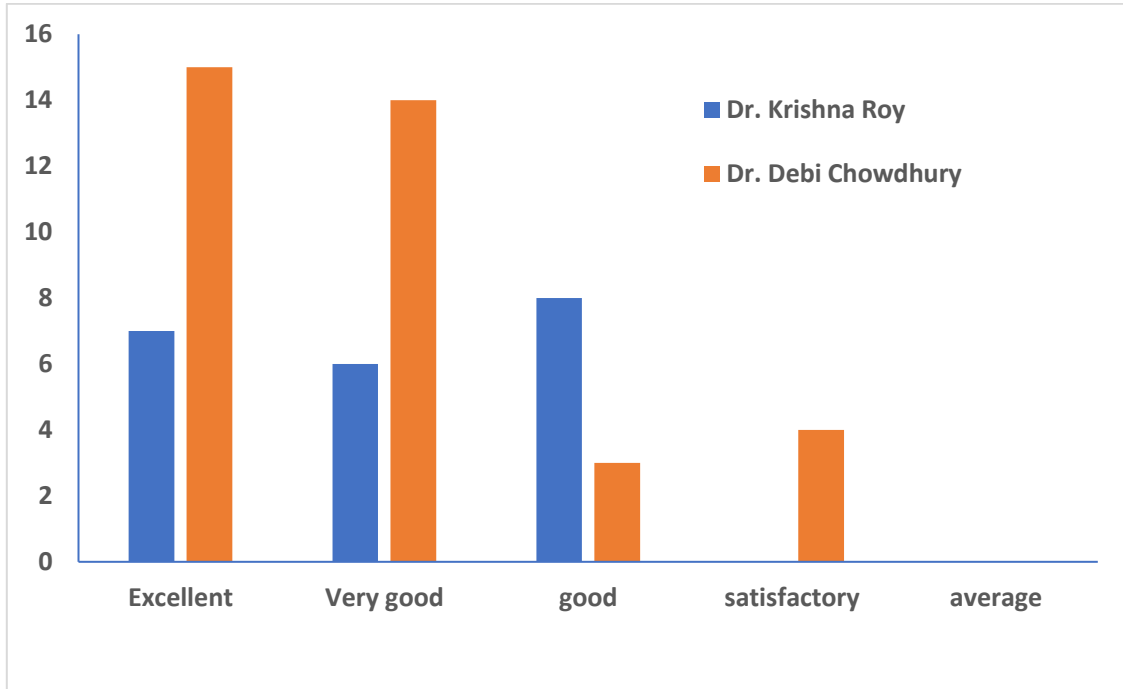

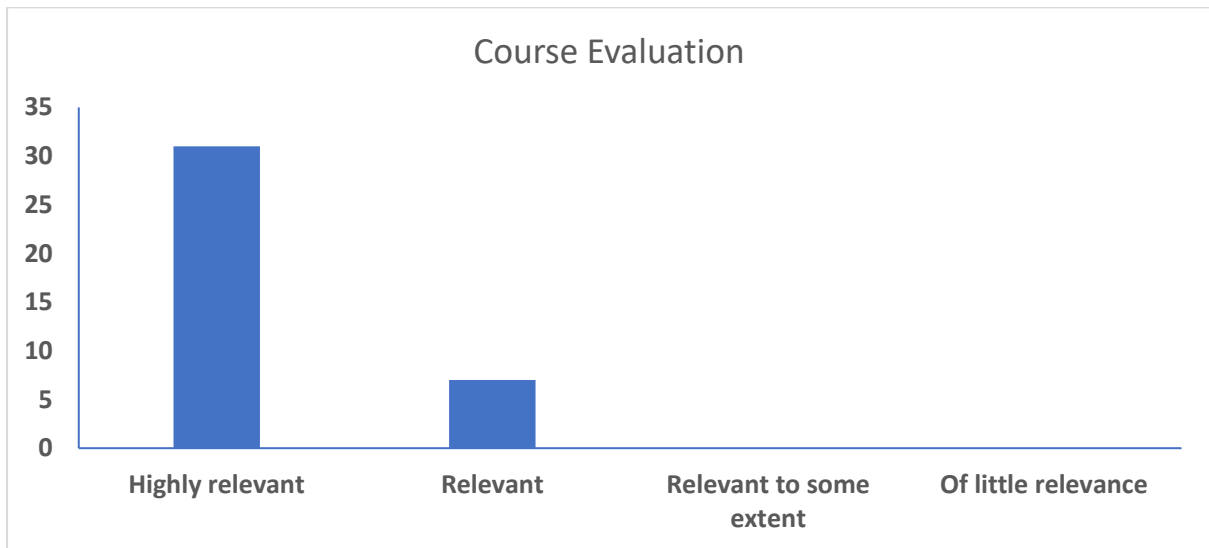

Plant Breeding by Dr Parthadeb Ghosh (Guest Faculty)

- This Subject should be excluded from the syllabus
- Permanent faculty needed. There should not be any biasness in the class
- Teacher have to clear his own concept, Then he will be able to taught students and properly. Because He taught boy students only and actually he come here to see boy students.
- Proper faculty for plant breeding is needed and very essentially Pathadeb Ghosh have to be replaced.
- Permanent faculty needed and Technically good teacher needed. Old fashion teaching methodology like this class not needed.
- For improving the course or teaching methodology a specialized permanent teacher is needed. Note based teaching methodology lead the students toward competition for marks not for conception. I personally suggest for a new teacher.
- Note based study is good for marks but concept doesn't build up. Teacher having biasness in teaching.

Plant Breeding by taken by Dr. Anup Kumar Sarkar

- Laboratory, Non-technical staffs are needed.
- Yes, Teaching process upgradation is needed
- Needed proper practical lab
- As it is not NET oriented subject, it should be excluded from the syllabus, if the committee think that this subject is necessary for us on this point of view the time of the class should be decreased.
- No I don't this so.
- No I have no any kind of suggestion for improving the course or teaching methodology

221 303 Plant Physiology & Biochemistry

Specific Comments:

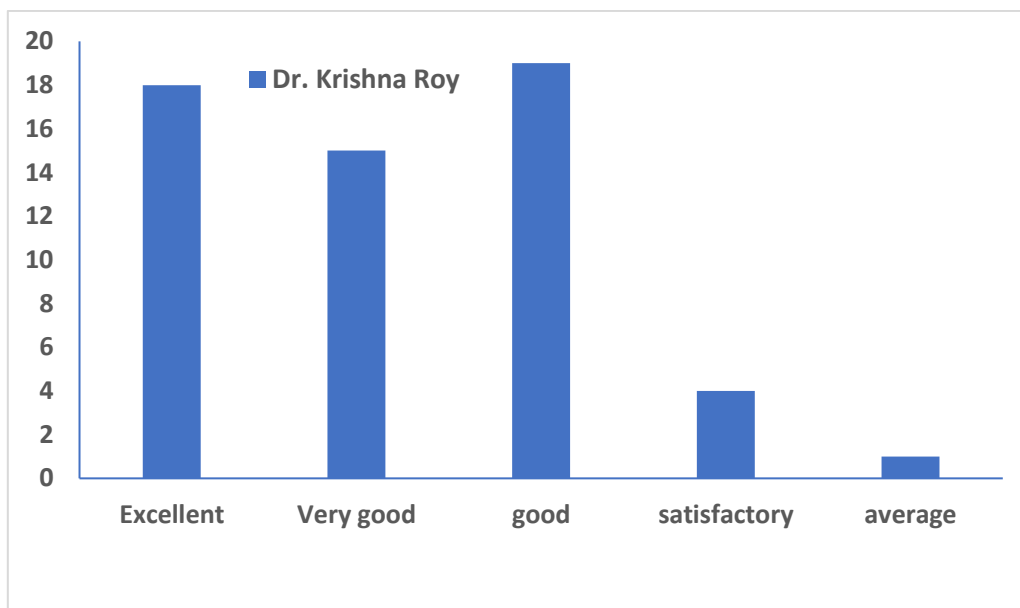

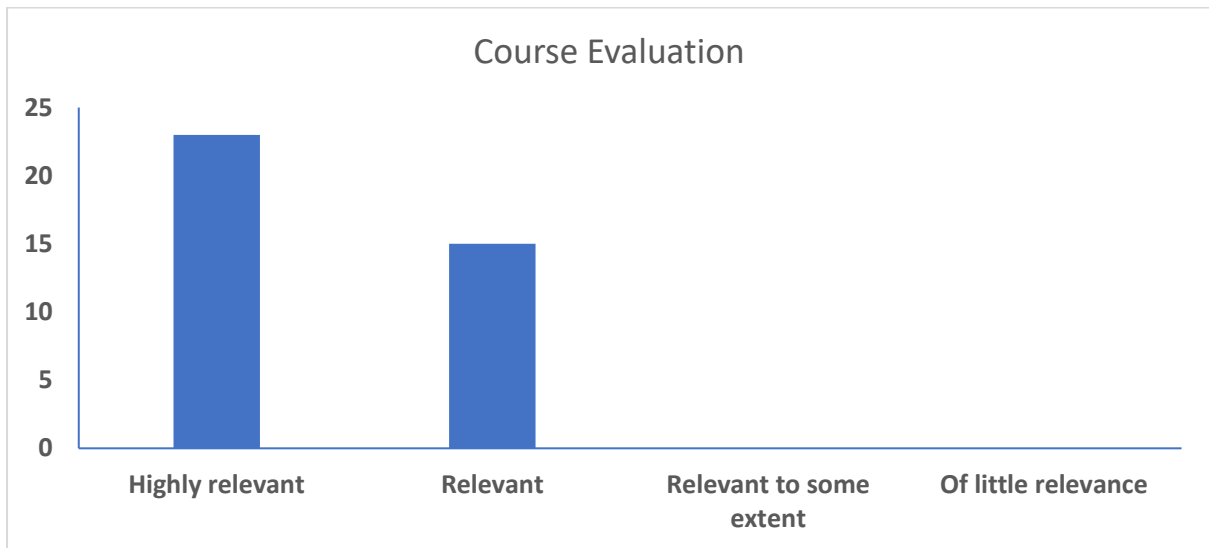

Plant Physiology and Biochemistry Taken by Dr. Debi Choudhury (Guest Faculty)

- I don't think so
- I have no any kind of suggestion for improving the course or teaching methodology.
- I don't have any kind of suggestion
- For improving the teaching methodology, teacher should explain the subject clearly and board work is also need.
- Needed permanent faculty
- Needed permanent faculty
- No, but we need permanent faculty

Plant Physiology and Biochemistry Taken by Dr. Krishna Ray

- I don't think
- Need board work and friendly behavior with us.
- No need to upgrade but revision should be required because of NET
- I don' want to give my suggestion but board work should be required.
- I don't think
- I do not have any kind of suggestion.

221 304 Plant Developmental Biology & Anatomy

Specific Comments:

Plant Developmental biology and Anatomy Taken by Dr. Krishna Ray

- Teacher may give freedom to students to ask questions about their problems and lesson.
- Mam if you kindly give us a overall idea that would be very much helpful.
- I think that the teacher student relationship should be better and board word is the mandatory things for the interaction with the students.
- Need better communication between teacher and Student with board work.
